

# Activity 7 – Metering – Trainer Brief

Brief – 20 minutes

Hand out meters explain to the group that will be using meter readings constantly in their roles within billing and that at times they may have to explain to a customer how to read their meter and how to find the meter serial number.

Refer the learners to pages ... To ... in their workbooks

From the pictures of the meters I would like you to take the meter readings (if you can read the register) or explain how you would, tell me whether the meter is standard or E7 if it is PP or not, where the serial number is and if the meter is gas or electricity and how you can tell.

### De-brief – 15 minutes

Ask the group to give details of each meter in turn, the answers are on the following sheets.

#### Gas Meter

Reading would be the black digits not the red.

The serial number would be by the barcode

Prepayment Meter

### Gas Meter

Reading is only the black  
not the red.

Serial number is under the  
barcode

Standard Gas Meter not  
Prepayment

### Electricity Meter Prepayment meter

The meter reading can be  
found by pressing the  
blue button and going  
through the screens

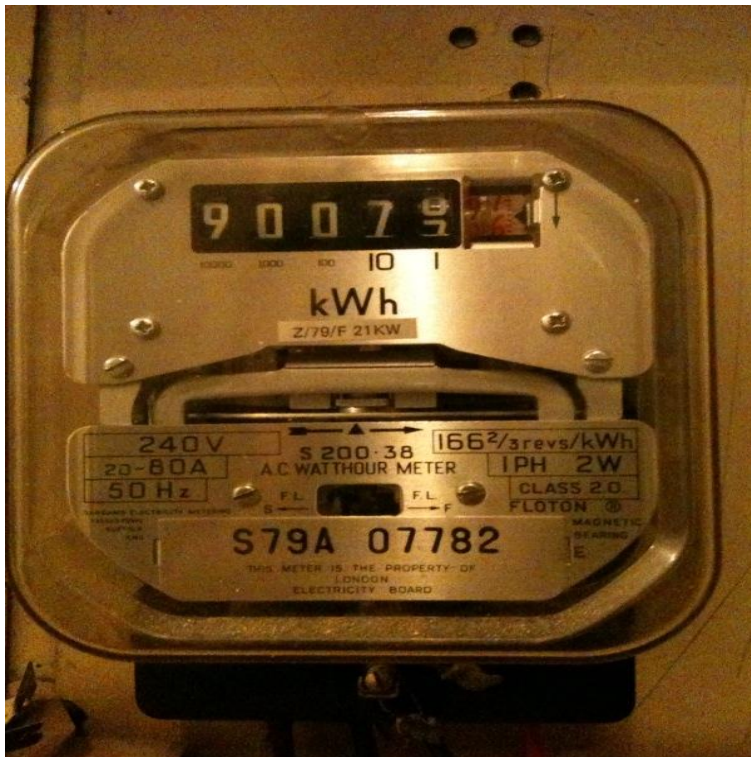

The serial number is  
below the barcode

Electricity E7 Meter

Meter readings can be found on the black registers one for day and one for night

Serial number is below the barcode

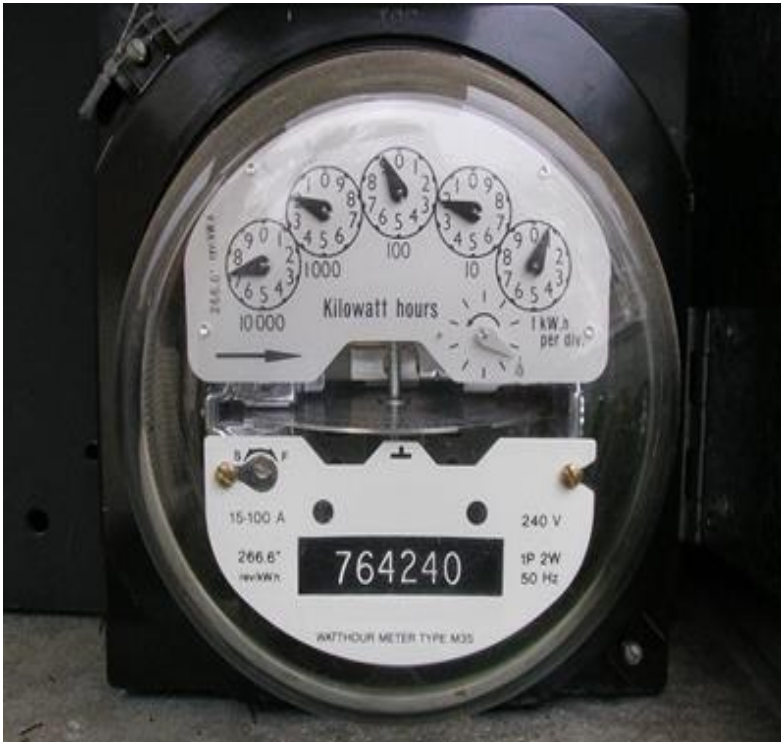

Electricity Standard meter

Meter Readings are on the black registers not the red.

The serial number has been branded on the metal plate below

Electricity standard  
Dial Meter
